SUBJECT INDEX
VOLUME 68

Acetaldehyde, production and disappearance, 282
Acetic acid production, by *Acetobacter aceti,* effects of DO and acetic acid concentrations on, 96
Acetic acid productivity, in high cell-density culture, 315
Acetobacter aceti, acetic acid production by, 96, 315
Acremonium strictum, transformation of progesterone by, 238
Activated carbon fabric, as a carrier of microorganisms, 437
Activated sludge
  adsorption of cationic surfactant by, 365
  anaerobic removal of organic matter by, 360
  dewatering of, 117
Adenosine, IMP production by baker's yeast from, 325
Administration, of recombinant-tGH to juvenile rainbow trout, 79
Adsorption *Equilibrium*, 37
Aerobic treatment, 433
Affinity precipitation, 32
Airlift fermentor, 112
Alcaligenes hydrogenophilus
  cloning of H_2-oxidation genes in, 225
  hydrogen oxidation plasmid from, 207
Alcohol dehydrogenase, from *Schwanniomyces castellii*, 404
Alcoholic fermentation
  in wine making, 131
  monitoring of, 282
Alginate fiber, with double gel layers, 216
n-Alkane-utilizable yeast, *Candida tropicalis*, 411
Alternative pathway, of complement, 395
5-Aminolevulinic acid
  production by methanogens, 88
  production by photosynthetic bacteria, 378
  production of, 88
Aminolevulinic acid synthetase, effect of iron on, of photosynthetic bacteria, 378
Aminopeptidase, secretion in *Bacillus subtilis*, 289
Amylase production
  by *Aspergillus niger,* in submerged culture, 339
  by *Bacillus amyloliquefaciens*, 423
α-Amylase
  inhibitor, from *Streptomyces nitrosporeus*, 56
  raw-starch-digesting, from *Bacillus* sp. B1018, 247
  thermophilic enzyme, 243
Anaerobic DOC removal, by activated sludge, 360
Anaerobic degestion
  for methane production, 296
  of Rain Tree kernels for methane generation, 154
Antgens, binding ratios of, 37
Anthocyanin, production by carrot cell line, 102
Antibody, 37
Arthrobacter, 68
Ascorbate oxidase, production of, 193
Aspergillus niger
  amylase production by, 339
  gluconic acid production by, 112
Aspergillus oryzae, 7
Assay method of protein, in *mirin*, 49
ATP-production of, by bacterial and yeast cells, 417
Aureobasidium, production of erythritol by, 310
Autolysis, of *Bacillus subtilis*, 252
Autoregulator, 170
Azolla pinnata, uptake of heavy metals by, 64
Bacillus acidopullulyticus, pullulanase from, 233
Bacillus macerans, 14
Bacillus megaterium, bioalteration of lignin by, 151
Bacillus sp., α-amylase from, 247
Bacillus subtilis
  autolysis of, 252
  secretion of *Escherichia coli* aminopeptidase by, 289
Baker's yeast, IMP production from adenosine by, 325
Bead size distribution, 40
Biological degradation, of methyl mercaptan, 437
Biological deodrization, 437
Breeding, of non-foaming mutant, 310
Bubble column, 25, 160
Butyrolactone, 170
Callus, of cucumber, 193
Candida curvata, growth and lipid accumulation in, 344
Candida tropicalis, peroxisomes in, 411
Carbon dioxide, production rate of, 131
S-(Carboxymethyl)-L-cysteine production, with tryptophan synthase, 84
Carrot (*Daucus carota*), anthocyanin production by, 102
Caseinolytic activity, collagenase with, 399
Cell fusion
  between *Aspergillus oryzae* and *A. usamii*, 210
  of *Zymomonas* auxotrophs, 286

Cell leakage, from gel matrix, 216
Cell mass, on-line estimation of, 220
Cellulase
from *Clostridium cellobioparum*, 75
purification of from thermophilic anaerobe, 183
Cellulase gene, cloning of, 75
Cellulolytic clostridia, host-vector system for, 371
Ceramic membrane, cross-flow filtration by, 200
Chloramphenicol, inhibition of autolysis, 252
4-Chlorobiphenyl degradation, by a two-step culture, 68
p-Chloromercuribenzoic acid, stabilization of lipase with, 136
Circular dichroism spectra, of recombinant-tGH and native tGH, 79
Circulating bed fermentor, cultivation in, 19
Cladosporium, wine cellar mold, 230
Classical pathway, of complement, 395
Cloning, of cellulase gene from *Clostridium cellobioparum,* 75
Clostridium cellobioparum, cellulase from, 75
Clouding *mirin*, 49
Coculture of *Kluyveromyces* and *Zymomonas,* ethanol production by, 305
Cocurrent downflow, with gas entrainment, 160
Cold resistance gene, of *Escherichia coli*, 383
Collagenase, from *Pseudomonas* sp., 399
Complement activity, of classical pathway and alternative pathway, 395
Compost piles, *Bacillus megaterium* from, 151
Computer simulation, of batch culture, 123
Continuous culture, of *Acetobacter aceti*, 96
Continuous ethanol fermentation, by a flocculating yeast, 107
Continuous fermentation, by immobilized yeast cells, 216
Conversion, of ATP-producing process to IMP-producing process, 325
Corn stover
334
glucoamylase immobilized onto, 148
Co-cultivation of thermophilic anaerobic bacteria, *Methanosarcina* sp. and *Desulfotomaculum nigrificans,* 353
Cross-flow filtration
with ceramic membrane, 200
with microporous membrane, 148
Cross-linked polyvinylpyridine, increase of bacterial population by, 433
Cucumber cell, ascorbate oxidase from, 193
Cyclodextrin, branched, 233
β-Cyclodextrin, 68
Cyclodextrin glucanotransferase, from *Bacillus macerans*, 14
Cytochrome P-450, in *Rhodotorula minuta*, 174
Defloculation, of a floculating yeast, 107
Degradation, of kraft lignin, 151
Desulfotomaculum nigrificans, inhibitor of, 353
Dewatering, of activated sludge, 117
Dextrins, from potato starch, chemical characterization, 14
Diehalogenation, 68
Diffusion coefficient, of oxygen in gel beads, 40
Dimethylterephthalate, bacterial degradation of, 375
DNA probe, for the detection of *Salmonella* in food, 1
DNA production
by continuous culture of *Pseudomonas aeruginosa* KYU-1, 148
by *Pseudomonas aeruginosa,* 92
Effect of aeration, on stability of ethanol fermentation, 107
Effect of ammonium concentration, on amylase production, 423
Effect of iron, on growth and aminolevulinic acid formation by photosynthetic bacteria, 378
Effect of yeast extract, on acetic acid production, 315
Effectiveness factor, for cells immobilized in micro-gel beads, 40
End product inhibition, 123
Energy generating system, in yeast cells,, 417
Enzymatic production, of *S*-(carboxymethyl)-L-cysteine, 84
Erwinia carotovora
lipopolysaccharide production by, 320
nucleoside phosphorylase from, 417
Erythritol
bioconversion of glucose to, 310
productivity, in high glucose concentration medium, 310
Erythropoietin, expression in Namalwa cells, 257
Escherichia coli
S-(carboxymethyl)-L-cysteine production by, 84
cold resistance gene of, filamentous growth in,, 383
Escherichia coli cells, solubilization of recombinant tGH in, 79
Ethanol fermentation, of orange waste, 277
Ethanol fermentation system, coupled with stripping and rectification, 25
Ethanol production
by immobilized yeast, 213
by *Saccharomyces cerevisiae*, 144
from lactose, by coculture of *Kluyveromyces* and

Zymomonas, 305
Ethanol rectification, in coconut shell chachoal packed column, 25
Ethanol stripping, in bubble column, 25
Expression theory, 117
Extracellular LPS, production of, 320
Extracellular polymer, of activated sludge, 117, 365
Fed-batch culture
ammonium controlled, 423
control of specific feed rate of meat extract, 19
Feed-harvest culturing method, repeated batch culture, 60
Fermentation mechanism, of IMP production from adenosine, 325
Filamentous growth, in *Escherichia coli*, 383
Flocculating activity, of yeast, 107
Fluorometric method, for determination of proline, 222
Fruit body, of mushroom, 64
β-Galactosidase, immobilization of, 293
Gas holdup, measuring method of, 160
Gas membrane sensor, 282
Gene expression, for erythropoietin production, 257
Genetic recombination, by cell fusion, 286
Gluconic acid production, by *Aspergillus niger,* 112
Glucose isomerase, immobilized enzyme, 136
Glutamic acid production, 220
γ-Glutamylcysteine synthetase gene, of *Escherichia coli*, 390
Glutathione, in *Saccharomyces cerevisiae*, 390
Glutathione biosynthesis, in *Saccharomyces cerevisiae*, 390
Glutathione synthetase gene, of *Escherichia coli*, 390
Glycine, extracellular release of α-amylase by addition of, 243
Grapes, determination of proline in, 222
Growth of fungi, on the solid substrate, 7
H_2-oxidation gene, from *Alcaligenes hydrogenophilus*, 225
Heavy metals, uptake by *Azolla pinnata*, 64
High-aeration capacity, of shake flask, 157
High cell-density culture, viability of cells in, 315
Human IgG, ligand for affinity precipitation, 32
Hybridization, between DNA probe and *Salmonella*, 1
Hybridoma cells, immobilization of, production of monoclonal antibody by, 264
Hydrogen oxidation plasmid, transfer of, 207
3-Hydroxy-3-methylglutaryl CoA reductase activity, of *Saccharomycopsis fibuligera*, 58
Immobilization
of β-galactosidase, 293
of pullulanase, 233
of yeast on mineral Kissiris, 144
of *Saccharomyces cerevisiae*, 213
Immobilization method, for prevention of cell leakage, 216
Immobilized enzyme, for multi-stage reactor system, 136
Immobilized glucoamylase, recycling use of, 148
Immobilized growing mycelium, 60
Immobilized hybridoma cells, entrapped by alginate gel, 264
Immobilized plant cells, 330
Immune lysis, 395
Immunoaffinity chromatography, 37
Immunoliposome, 395
IMP production, from adenosine by baker's yeast, 325
Inclusion bodies, of r-tGH, denaturation and renaturation of, 79
Indian *dosa* fermentation, 52
Inhibitor, for α-amylase, 56
Inhibitory substance, of sulfate reducing bacteria, 353
Interesterification, using dried cells, 19
Isobutene, formation of, 174
Ketoalkane, production of, 188
k_La, volumetric oxygen transfer coefficient of the liquid film, 71
Kluyveromyces fragilis, ethanol production by, co-culture of *Zymomonas mobilis* with, 305
Koji, prepared with the fusant strain, 210
Kraft lignin, bioalteration of, 151
Lactate fermentation, 123
Large scale production, of anthocyanin by carrot cell culture, 102
Lavandula vera, immobilization of, 330
Lignin peroxidase production, by *Phanerochaete chrysosporium* INA-12, 60
Lipase
production by *Rhizopus chinensis*, 19
stabilization of, from *Thermomyces lanuginosus,* 141
Lipid accumulation, in *Candida curvata,* 344
Lipopolysaccharide, production by *Erwinia carotovora,* 320
Liquid jet, 160
Lyophyllum cinerascens, shimeji, mushroom, 178
Malic enzyme, of *Pseudomonas diminuta,* 301
Maltosyl (α1→6) cyclodextrin, 233
Mathematical model, for batch culture, 123
Metallo-enzyme, peptidase, 178
Methane fermentation
200
effect of inhibitor of sulfate reducing bacteria on, 353

Methane generation, by anaerobic degestion of Rain Tree kernels, 154
Methanogenesis, by *Methanosarcina*, effects of volatile fatty acids on, 428
Methanogens, 5-aminolevulinic acid production by, 88
Methanosarcina, methanogenesis by, 428
Methanosarcina barkeri, 5-aminolevulinic acid production by, 88
Methanosarcina sp., inhibitor of sulfate reducing bacteria without adverse effects on, 353
Methyl mercaptan, biological degradation of, 437
Methylalkylketone, 188
Mevalonate fermentation, by *Saccharomycopsis fibuligera*, 58
Mevalonate kinase activity, of *Saccharomycopsis fibuligera*, 58
Micro-gel beads, production by rotating disk atomizer, 40
Mirin, removal of protein from, 49
Mirin, with much oligosaccharides, 210
Mirin-making, with special *koji*, 210
Mixed culture, of *Arthrobacter* and *Pseudomonas*, 68
Monitoring, of alcoholic fermentations, 282
Monoclonal antibody, production by hybridoma cells, 264
Monomethylterephthalate, 375
Morus alba, 296
Multi-stage reactor system, optimal temperature control of, 136
Mushroom
334
Pleurotus sajor-caju, 64
Mutation, of erythritol-producing yeast, 310
Mycelial distribution, in rice *koji*, 7
NADH production, from NAD^+, using malic enzyme, 301
Namalwa cells, erythropoietin production in, 257
Nucleoside phosphorylase, 417
Nutritional improvement, in *dosa*, 52
Oleaginous fermentation, by *Candida curvata,* 344
On-line estimation, of cell mass, 220
On-line prediction, of alcoholic fermentation kinetics, 131
Optimal temperature control, in multi-stage reactor system, 136
Optimization, of anthocyan production by carrot cell, 102
Optimum DO, for acetic acid production, 96
Orange waste, pretreatment of, ethanol production from, 277
β-Oxidation enzymes, 411
Oxygen enriched culture, 92
Palm kernel oil, 188
Partial pressure of dissolved oxygen, influences on DNA accumulation, 92
Penicillin, influence on the stabilization of anaerobic digestion, 154
Penicillium, wine cellar mold, 230
Peptidoglycan synthesis, related to autolysis, 252
Peroxisomes, in *n*-alkane-utilizable yeast, 411
Phanerochaete chrysosporium, lignin peroxidase production by, 60
Photosensitive resin prepolymer, 330
Photosynthetic bacterium, 5-aminolevulinic acid production by, 378
Photosynthetic sludge, in wastewater treatment, 269
Phototrophic bacteria, 269
Plasmids, from thermophilic clostridia, 371
Pleurotus sajor-caju, mushroom, 334
Polyphosphate, as energy source, 360
Polyurethane foam, cell immobilization with, 60
Polyvinyl alcohol gel beads, treated by freezing-thawing, 293
Potato starch, 14
Prepro-structure, of subtilisin, 289
Principal component analysis, 339
Progesterone, polyhydroxylation of, 238
Proline, in grapes and wines, 222
Proline analysis, an automated method for, 222
Proline iminopeptidase, from *Lyophyllum cinerascens,* 178
Proline specific exopeptidase, 178
Prooxisomes, 411
Protein A, from *Staphylococcus aureus*, 32
Pro-peroxisomes, 411
Pseudomonas aeruginosa, 68
Pseudomonas aeruginosa KYU-1, continuous culture of, 92
Pseudomonas diminuta, malic enzyme from, 301
Pseudomonas sp., collagenase from, 399
Pullulanase, from *Bacillus acidopullulyticus*, immobilization of, 233
Purification, of protein A, 32
Purple nonsulfur bacteria, 269
Pyrophosphate, as energy source, 360
Recombinant-tGH, chemical, structural and physiological analyses of, 79
Release of α-amylase, from transformed *Escherichia coli*, by addition of glycine, 243
Removal of protein, in *mirin*, 49
Reversibly soluble-insoluble carrier, 32
Rhizopus chinensis, intracellular lipase production by,

19
Rhodobacter sphaeroides, 5-aminolevulinic acid production by, 378
Rhodotorula minuta, isobutene fermentation in, 174
Rice *koji*, 7
Ricinus communis, 296
Rotating disk atomizer, 40
Ruth's filtration theory, 117
Saccharomyces cerevisiae
ethanol production by, 144
immobilization on γ-alumina pellets, 213
Saccharomycopsis fibuligera, mevalonate fermentation by, 58
Salmonella, detection of, 1
Salt tolerance, in *Zygosaccharomyces rouxii*, 165
Schwanniomyces castellii, alcohol dehydrogenase from, 404
Secretion, of *Escherichia coli* aminopeptidase, in *Bacillus subtilis*, 289
Sedimentation agents, 49
L-Serine, *S*-(carboxymethyl)-L-cysteine production from, 84
Serum-free culture, of Namalwa cells, 257
Settling, of activated sludge, 365
Shake-flask, high aeration capacity of, 157
Shimeji, mushroom, 178
Shuttle vector, for *Escherichia coli* and cellulolytic clostridia, 371
Sludge volume, reduction of, 365
Sodium alginate solution, atomization of, 40
Solid state culture, of fungi, 7
Sparger position, effect on k_La, 71
Stabilization of lipase, with *p*-chloromercuribenzoic acid, 141
Sterile glucose solution, production of, 148
Stirred-tank fermentor, 71, 112
Streptomyces nitrosporeus, production of α-amylase inhibitor by, 56
Stripping process, coupled with rectification, 25
Structure elucidation, 170
Submerged culture, of *Aspergillus niger,* 339
Sulfate, oxidized methyl mercaptan by microorganisms, 437
Synergistic effects of DO and acetic acid, on acetic acid production, 96
Thermomyces lanuginosus, lipase from, 141
Thermophilic anaerobe, cellulase from, 183
Thermophilic clostridia, plasmid from, 371
Thermophilic methanogen, 428
Thermostable cellulase, 183
Three-phase flow, 200
Transformation, of cellulolytic clostridium, 371
Transformed *Escherichia coli*, release of α-amylase from, 243
Triacylglyceride, 188
Trichoderma, production of ketoalkanes by, 188
Tryptophan synthase, *S*-(carboxymethyl)-L-cysteine production with, 84
Tuna growth hormone (tGH), produced in *Escherichia coli,* 79
Two-phase flow, 200
Uncompetitive inhibition, 123
Virginiae butanolide, 170
Wastewater treatment, 269
Wine cellar molds, *Cladosporium, Penicillium*, 230
Wines, determination of proline in, 222
Yeast, *Schwanniomyces castellii*, 404
Yeast cells, immobilized with alginate fiber, 216
Yeast enrichment, in *dosa*, 52
Zygosaccharomyces, salt tolerance in, 165
Zymomonas mobilis
ethanol production by, coculture of *Kluyveromyces fragilis* with, 305
spheroplast fusion of the auxotrophs, 286
